DevOps + ML = MLOPS RoadMap

YOUR LEARNING JOURNEY

You are here — ML foundations you have this

Model training, evaluation, scikit-learn, pandas, numpy, Jupyter

Phase 1 — DevOps core (3–5 months)

Linux, Git, Docker, CI/CD, cloud basics, infrastructure as code

Phase 2 — Bridge skills (1–2 months)

REST APIs, model serving, monitoring basics, data pipelines

Phase 3 — MLOps stack (2–3 months)

MLflow, Kubeflow, feature stores, model registries, drift detection

Practice — End-to-end project

Build a full pipeline: train → track → containerize → serve → monitor → retrain

RoadMap of DevOps to MLOps
